[Risk Evaluation for Asbestos.pdf](#)
[Risk Evaluation for Trichloroethylene.pdf](#)

Five attachments:

How we evaluate chemical safety – the overview of the process

Prioritization – lays out the process, links to the rule

Risk evaluation – lays out the process, links to the new rule, has the links to the individual chemical pages for the first 10

Example chemical pages: asbestos and TCE – has general info on what the chemical is and the links to the scope documents; in the case of TCE also has links to what we did before Lautenberg and risk mitigation activities. Let me know if you want to see all 10 chemical pages.
